**Subject:** opposed to vaccination bill  
**Date:** Wednesday, 3 July 2013 8:13:57 PM

---

Dear members of the committee on vaccination bill,

My wife and I are opposed to this bill because it is discriminating against non-vaccinating families. Vaccinated families continue to contract the diseases for which they have been vaccinated against.

I have done considerable amount of research into vaccination and consider it unsafe. We have 9 children and the last three who have not been vaccinated are the healthiest.

There is considerable evidence that vaccination causes autism. I personally know of several cases.

It would be wrong to exclude unvaccinated children from childcare.

The decision to vaccinate or not must be left up to parents.

**Bob and Gail Osmak**
