Subject: QLD exclusion of unvaccinated children from child care amendment Bill 2013
Date: Monday, 15 July 2013 11:57:08 AM
Importance: High

I submit the below for your consideration: -

Mrs Miller's Bill is bullying at its best and I respectfully request that it not be passed ! She fails to note that Parents are concerned about the Safety of Vaccines and I have put this forward to her only to receive her response which was obviously provided by the health department and the TGA - **statements about the safety and efficacy of vaccines with no evidence provided**. You must believe and have faith etc , etc ! **Yeah right !!**

Please note :The TGA does not have a post-vaccination surveillance system that can determine causal relationships with adverse reactions or the frequency with which they occur - for any vaccine. The TGA has a 'passive' surveillance system (voluntary notification) that cannot prove the government's claim that serious reactions to vaccines 'are rare' (any vaccine).

Also, The media and Federal government would like the public to believe that there is no **'other side to this issue'** and this is stated by Journalists in numerous News Limited publications i.e. Courier Mail, Sunday Mail , Daily Telegraph etc . In scientific issues ,there is always debate over the science and the media is preventing this debate from happening by constantly portraying this issue as anti-vaccination instead of 'choice in the use of vaccines in healthy people'.

This issue is particularly important because the Australian Government would like to follow the US lead and implement a policy that requires all children to be vaccinated with multiple vaccines (currently 11) before they are allowed to attend School. This is despite the fact that the majority of these vaccines have been introduced after the diseases became a very low risk to Australian children

<http://www.vaccinationdecisions.net/immunisation-policy.php>

Mrs Miller has jumped on the bandwagon of the New South Wales and News Limited with their **No Jab No Play** campaign ..

Also, bear in mind that Parents are vaccinating their Families by other than **traditional** means .. Homeopathy

VACCINATION ALTERNATIVE

Homoeoprophylaxis (HP) - the use of homeopathy for specific disease prevention

I believe that individuals must have the fundamental right to control the medications for their Children and to take this right away by passing this draconian bill put forward by Mrs Miller would be a violation of our basic Human Right and would also be totally discriminatory !!

Could you please acknowledge receipt of this email

Best regards
Glenn Williams
