The Chairman.  
Heath and Community Services.  
Parliament House.  
George Street. QLD. 4000.  
BRISBANE.

Dear Sir.

I wish to re-affirm the revision of the proposed amendment to the Act, for legislation as forwarded by Peter Ogilvie.

As mentioned, the Act; Nature Conservation and other Legislation Bill no 2 2013; the primary purpose is the conservation of regional parks and protected areas. If I understand correctly, the proposed amendment in question ( Section C) certainly needs to be revised and clarified. Allowing access into preservation zones becomes a challenge for management, a privilege, as to basic rules need to be applied and implemented.

Social prerogatives and Cultural traditions need to remain resolute in endorsing the Preservation of our National Heritage. We need to remain engaged, be aware, vigilant, and share responsibility for our natural heritage.

Commercial interest should revolve around the basic rule, align initiatives and not compromise the prime objective. This submission also requests that statements for management be subject to a single public consultation process.

A true concern for the natural environment strives to unify incentives, and, in turn, this brings about the dissipation of dissonant indifference. Interactive involvement and successful intervention in the restoration of nature also brings it's own rewards.

Thus, as i, only another Disciple for the Preservation of wildlife and the natural environment.

Yours truly,  
rensche schep.
