Dear Sirs/Madams

I submit this in relation to public advertising which should all be 'G' rated and believe this is our right as citizens. I do not want my children, especially my teenage sons to be viewing pornographic material on billboards. By pornographic, I mean any pictures or innuendo that would not normally be seen on a family beach at the very least. Naked or semi-naked women should not be shown as this denigrates all women. Not to mention that it severely embarrasses me as a woman, wife and mother.

[REDACTED]

I ask that you legislate that public places display matters of interest to the general population only and ensure they are aesthetically pleasing as well as truthful, moral and beneficial to our society and visitors to our state.

Yours sincerely
Debra Mieth
