Inquiry into telehealth services in Queensland

A brief submission on behalf of Longreach Regional Council regarding telehealth services.

Terms of reference	Comment
Examine the factors that support successful implementation of telehealth services and identify any barriers to successful implantation	Council would suggest that in order for telehealth to work effectively, consideration should be given to the reliability of telephone services and/or voice-over-IP protocols. This mainly relates to rural and remote locations that may utilise telehealth such as Yaraka and the Health Clinic in Isisford.

Please do not hesitate to contact me should you require further information.
