Public Submission by Cynthia Goodman.

We are heading down a path in our society that is failing to help the next generation understand and appreciate that life is precious and should be at a minimum the basic right of every person especially the vulnerable and weakest among us.

The ramifications as a government and those who make these decisions on behalf of the people of this country are impossible to ignore as our leaders continue to ignore the decisions that are failing us all as a nation.

I urge the committee to recommend Parliament pabcd this legislation on behalf of the people of this nation.

Hi, I'm Cynthia, I live in Brisbane and work in IT

It's completely immabcd to be abcding these babies that are born alive. They should have a right to life just like any other child and be protected under our laws which are there to protect the innocent and vulnerable in our communities

Sincerely, Cynthia Goodman
