Parliament House
CANBERRA ACT 2006
AUSTRALIA
Sun Apr 28 2024
Public Submission by Kurt Dunlop.

Allowing human babies to die because their biological parents have chosen to reverse or delete it due to whatever circumstance, is a total misuse of the power to create life and society is crumbling as the worth of a human being is being eroded away. Leaders who allow such laws as the erasing of humans will have to account for their actions, and are a conduit for the breakdown of society.

I urge the committee to recommend that the Parliament pass the legislation to protect and save the lives of human babies born alive during or after an abortion.

Hi, my name is Kurt Dunlop. I live in Bundaberg and currently work casually as an Allied Health Assistant. I am also a full-time student in my third year of Bachelor of Occupational Therapy (Honours). I am a father of four children and have 63 nephews and nieces.

I believe it is essential to provide healthcare to any human baby born alive during or after an abortion because a baby does not have the capacity to make a decision but should be afforded the same right to life as other alive human being in any emergency situation regardless of what their biological parents choose for themselves, unless it can be proven that in keeping the baby alive will cause permanent or irreparable damage to the child and therefore result in cognitive, physical or social impairments that renders the person dependant on others for life support.

I believe that the government should acknowledge and act for the voice of the people who can't or don't have the capacity to make educated decisions, such as babies.

Sincerely, Kurt Dunlop
