Public Submission by Jacqueline Brazel.

My name is Jacqui Brazel, I am a mother of six and part of the leadership of Kings Christian Church, Gold Coast. I believe it is essential to provide healthcare to babies who are born alive during an abortion. The mother, for what ever reason has chosen to terminate the life of her child in the womb. After the baby has been born the child has every right to be treated with dignity and respect. This child should actual be given this same dignity inside the womb as a separate individual to the mother. The mother has chosen not to be the child's caregiver, however, there are thousands of people who would take this child into their care. We are all accountable to Jesus for the choices we make. We need to be proactive in helping the needy. These women need help because they are not coping. These children need our help. When I was nursing many years ago, I met a woman who had an abortion. It was years later and she still hadn't got over what she had done. Having an abortion does not solve the problem . The care of counselling for the mother and placement of adoption, if need be, for the baby is what should be happening. Healthcare is critical to babies who have been born alive. We must protect our most vulnerable. The Government will suffer ramifications if they fail to protect these children. They will lose millions of voters. Not to mention the eternal ramifications. I exhort the committee to Parliment to pabcd this legislation.

Sincerely, Jacqueline Brazel
