Public Submission by Ana.

Hi, I'm Ana O'Brien, I'm a 39 year old woman living in Perth with my husband and 6 children. I believe this bill is essential to providing dignity to children, citizens of this country, and living breathing human beings that are born alive after an abortion. There are undoubtedly countless families that are longing for children that cannot have them. If children have survived such a procedure, without doubt they should be given life giving care and a chance for a life. It is absolutely fundamental children are given this right to live. It's simply a basic human right. It also allows the medical professionals involved to be able to do their jobs with a clear conscience. If the government fails to pass this legislation, Australia will be consciously responsible for infanticide, which is barbaric, especially in these modern times and in a country where we have so much to give. In conclusion, to make a positive difference in the lives of countless people, I urge the committee to pass this legislation.

Sincerely, Ana
