Public Submission by Kathleen Airey.

Dear Sir/Madam, My name is Kathleen, I reside in Brisbane and I work in healthcare. It is essential to provide healthcare for these little fighters who are demonstrating life separately from their Mother despite their traumatic entry into the world. They are crying for help. Can any of us say this one doesn't deserve to live? It is a fundamental responsibility of the Government to protect the most vulnerable. The ramifications would be shocking if the Government fails to pass this legislation. There would be severe mental health problems for the mother especially if she hears the baby's cry and continues to request it be aborted or is informed later that the baby survived but was left to die. The mental health of medical staff in attendance who may not agree on neglecting a newborn's cry for help may feel like co-conspirators to abort. There would be life long implications for all involved who witness such shameful lack of action. I implore you to pass the legislation so you can sleep peacefully at night.

Sincerely, Kathleen Airey
