**Subject:** Midwives administering the abortion pill  
**Date:** Saturday, 13 January 2024 10:03:57 AM

---

Dear HEC

PLEASE do NOT support the Bill to recommend that midwives etc may administer the abortion pill.

The health system exists to protect life, not kill it, and the IVF system is proof and the whole pregnancy care system is proof that a fertilised egg is a human being.

To actively intervene to kill this new life is just another means to enhance the culture of death in society. I will never forget when a bloke standing at a pub when the pro-life was march was on, proudly calling out on the top of his voice for all families and children to hear, 'I killed my baby'.

And then the Government wonders why is there such an increase in domestic violence, because life is cheapened by the Government to be disposable like rubbish. That's the message you, ie Government, reinforce with killing of babies up to full term, to kill it. That's why some people think nothing of doing what you legalise.

Did you know that Steve Jobs of Apple was born out of wedlock and was thankfully not terminated by committee recommendation like you are deliberating, but was adopted and nurtured to give to society in an incredible way.

Did you know the best fiddle player in the world, Michael Cleveland, was born blind and with a cleft palette, and was welcomed into the world to give to society in an incredible way.

Justin Bieber's mother Pattie Mallette conceived him while 17 years old and unmarried, and loved and nurtured her baby and did not kill him and Justin has contributed to the world in an incredible way.

How many Steve Jobs', Michael Cleveland's and Justin Bieber's have been sacrificed to the culture of death? Please do not add to this travesty of injustice.

The WHO advised for 2023 that 44 million babies were aborted in one year, which makes the world wars pale into insignificance. Please do not add to this as Government legislation becomes the new major killer of humans.

[Tasmanian teen mum's support program goes national](#)

### Tasmanian teen mum's support program goes national

After becoming pregnant at 16, Bernadette Black said people "looked at me critically and judgmentally and made me think that I should be embarrassed and ashamed" — now, the Tasmanian support program she set up to help other young women is going national.

---

where pregnant women can be shown support and love, not stigmatised and death.

We are all answerable to God on judgement day for our deeds in this life, let your actions to this email be witness to protect life, not kill it.

Thanks  
Paul Swan
