**Submitter Comments:**

I believe that such powers should ONLY be exercised by a Minister, who is a democratically elected representative of the people, who is ACCOUNTABLE to the people for all actions taken. There should be a wide-ranging and open public debate on how the State steps away from the ongoing state of emergency powers framework. You are not to comply with the World Economic Forum Agendas. Matters of this nature and extent are far too important and far reaching to be arranged and administered in private. It is not Democracy as we understand and expect it to be. Giving such powers to any health organisation or health minister is tyranny.
