Submitter Comments:

As a citizen of Australia and voting member of the public, I do not agree with the continuation of the emergency powers being extended, changed or altered. This bill and these powers given to the CHO should not be continued, as I have not voted for this CHO, the CHO is not an elected member of parliament who is accountable in their actions. If we were a democratic society, we the people have the power to determine health actions and accountability of those actions, independently of an unelected health office. Further more, as outlined in the bill, there is no clear definition of reasonable situations that this bill could be enacted.
