Submitter Comments:

I have serious concerns about this bill. It has become obvious that the previous procedures to combat Covid 19 were not only ineffective, but also counter productive. It has been proven that the best way to beat Covid 19, is Vitamin D from the sun and being healthy. Restricting people from going outside and exercising increased their likelihood of becoming sick. Also, it increased domestic violence, suicide, alcoholism and drug use. I am under the impression that Australia had a pandemic plan for over 30 years which was ignored in 2020. Also, the people in power followed propaganda, not science and silenced doctors and specialists in their field who explained that the propaganda didn't make sense. Also, the projected effect of Covid 19 was compiled by an academic organisation with a proven track record of exaggerating the numbers. In early 2020, they were predicting about 20% death rate when in fact it was more like 2% and pretty much 0% in children under 25. I am astounded that doctors are so glib to push the unproven, experimental mRNA treatment on children after the thalidomide and human growth hormone debacles. We do not have any long term safety data for this treatment and we didn't find out the ramifications of thalidomide or human growth hormone for about 20 years. And you expect parents to inject an unknown, unproven treatment on the most vulnerable? The vaccine has been proven to have killed and seriously harmed more people than all vaccines in history. This government is guilty of mass murder and manslaughter do not compound this travesty with this bill.
