Submitter Comments:

The queensland government is acting in the interests of corporations and not the people. This bill seeks to put dangerous and unnecessary supposed power in the hands of an unelected and unaccountable individual. As can be seen from the last 2 years the queensland government is not component to manage peoples health. Health decisions should be entirely on the individual and never on the state. The state has abused its trust of the public in enacting emergency powers that were used to deprive people of their god given natural rights.
