Subject: Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2020

Categories: Submission

Dear Sir/Madam

I wish to submit my objection to the above extension of Bill.

With only 6 deaths in Qld, I cannot see the need to extend emergency powers, with attendant lockdowns, destroying of the economy and taking away of people's freedoms to live their lives

With respect, I remain convinced that it is time to return people's lives to them and let the people make up their minds to isolate if they are at risk. The whole of society does not need to lockdown.

Regards, Leonie Bosscher
