Re:

Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Bill 2020

I vehemently oppose the above bill as evidence bears out the fact that Covid-19 is not the deadly pandemic that these so called health 'experts' have made it out to be and therefore any extension to their powers/authority is redundant. Statistics from Australian government agency websites indicate clearly that Influenza and pneumonia are more than twice as deadly as Covid-19 in 2020 in Australia.

(Inserted ABS stats on covid vs Influenza and Pneumonia)

The government has consistently overreacted by implementing increasingly draconian measures which befit a Fascist government and has no place in a democracy.

The Queensland Health Minister does not know her own portfolio's policies/rules/guidelines in reference to mask wearing during the latest attempt at fear mongering.

<https://www.google.com.au/amp/s/amp.theaustralian.com.au/breaking-news/one-brisbane-mask-rule-is-confusing-everyone-including-the-states-health-minister/news-story/89e917baf92fa56ba71959c919d2267f>

The Chief Health Officer is an unelected bureaucrat who has no clinical experience for at least 15 years and is out of touch as a frontline physician. The Chief Health Officer has set a course for the response to Covid-19 which is clearly extremely dangerous as she has not considered the impact of unintended health consequences of lockdown, social distancing and 'mandatory' mask wearing. While it is easy to count the deaths 'with' Covid-19, it is a far more complicated and lengthy task to count the deaths of despair that will ensue over the coming months and years due to her actions.

Changing course to one of complete transparency and limiting government control rather than expanding is the more appropriate action to take. I completely oppose the proposed bill and respectfully request that it never sees the light of day again in Australia which as far as I understand it to be is a free democratic country not a barbaric fascist medical authoritarian technocracy.

Yours sincerely
Stevie Pringle.
