To whom it may concern

I am writing to request that the request for extension of the powers granted to our government under the Public Health and Other Legislation (Extension of Expiring Provisions) Amendment Act 2020 requesting an extension for the An Act to amend the Justice and Other Legislation (COVID-19 Emergency Response) Amendment Act 2020, the Mental Health

Act 2016, the Public Health Act 2005 and the Public Health and Other Legislation (Public Health Emergency) Amendment Act 2020 for particular purposes, not be approved.

I am gravely concerned about increasing the power given to those in government working for the people of QLD. We have just witnessed a gross over reaction to 1 case of a "UK" strain of coronavirus that led to a 3 day lockdown. There appears to be no concern about the scientific aspect with what the WHO and CDC has advised. There is no scientific basis to lock down healthy people for a case. There is no scientific data on mask wearing in fact the clinical data out there clearly states that it can cause major illness for a healthy person wearing a mask.

I have asked on numerous occasions to see a copy of the clinical paper showing that this virus has been fully isolated. The only paper is a partial isolation. How can a lockdown be based around a virus that hasn't been fully isolated?

I am very concerned that the Bio Security ACT of 2015 is not being adhered too. The government must show a bio security control order which clearly shows that a person has been in contact with an infected person as stated in section 88. I am also concerned that the Bio Security Act 2015 section 91 has not been adhered too. This is of major concern. When the inventor of the PCR test clearly states that this test should not be used for diagnosis. It even clearly states on the insert in the packet. Hence why there are litigation cases overseas happening as we speak

We have had no deaths in a very long time. I believe this has become more of a case of a pandemic with no scientific basis.

Will it be continual lockdowns, ridiculous double standards for businesses and events, keeping a country in constant fear of other people, of human touch, making singing, shouting and dancing an issue, keeping families separated and causing huge levels of depression and other mental issues, locking up the elderly, turning state against state, suburb against suburb and neighbours. The suicide rates have increased by 200% is this not a concern? Do their lives not matter?

Regards
Aprille Walker
