**Submitter Comments:**

I live in a unit of 9. Verandahs are close. Cigarette smoke drift from other tenants whirl around the building and invade our home and sleeping areas causing difficulty breathing, sore eyes, skin rashes. I use antihistamines daily and have purchased air filters for this. . QLD CANCER council advises if you can smell drift your breathing it. I would appreciate full ban on cigarette smoking in Strata titles (particularly verandahs). We are not anti people smoking, we just do not want to be subject to it.

### **Submitter Comments:**

Living in Strata title is presenting health problems because cigarette smoke drift from close units and people smoking on balconies invade our unit daily. Please ban all smoking on balconies in Strata titles. Why can't Queensland be the same as nsw smoking laws?
