

Submission into the Voluntary Assisted Dying Bill 2021

Submission No.: 45
Submitted by: Cris Geri
Publication: Making the submission and your name public
Position: I/We do not support the Voluntary Assisted Dying Bill
Comments in relation to: Other
Attachments: No attachment

Submitter Comments:

Dear committee members

Please read the email below that was sent to Dr Robinson and Deb Frecklington

If any one of you holds that any of the points/details therein contained are incorrect I require that you write down and sign, at your own unlimited liability, the facts and reasons why my statements are incorrect.

In the alternative, whatever decision you make, will be with conscious acceptance of the Natural Law consequences of voluntary acceptance of any Natural Law crimes pursuant to any action taken according to your several and/or individual decisions on this mater.

Dear Dr Robinson

We agree with your stand on so called assisted suicide, but it would appear to any aware observer, that palliative care and other methods of programmed nonconsensual euthanasia have been practiced in Qld hospitals for, at least, decades.

Please make these issues public record with a view to ending these issues along with VAD and abortion in any circumstance.

The simple points here are:

If it is not your DNA, it is none of your business.

And as you have stated, this will open a pandoras' box as it has in other countries.

Thank You

Respectfully yours

Cris Geri
