Euthanasia 4/5/21 To all Parliamentarians

Dear Ladies & Gentlemen,

It is distressing to know of the bill for euthanasia against the opinion of many health groups. It's against their conscience and the oath they have signed to save life, not destroy it. If you support the bill you are taking upon yourself the prerogative of God to decide on a person's life. Please don't take on yourself what is God's right to determine the length of one's life.

While you may think of relieving the patient of his suffering through euthanasia, don't you think you could do it through providing better palliative care so the person can live and not want to die?

I beg you to reconsider your decision to support euthanasia and have a conscience clear before our great God and Judge. Suffering can be alleviated in other ways especially by helping the patient seek healing from God, the great Physician. Everyone including you need to cry to God for help to know how to help those suffering from severe illness. I too will pray for you to make the right decision.

'God has chosen the poor of this world who are rich in **faith**—Salvation is gained by keeping the whole law—**Faith without works is dead**'. James 2:17
