Submitter Comments:

I believe it is my choice to make this decision. I do not believe in prolonging life and having seen how the process works in Europe, I fully agree that the system is satisfactory. I do not believe it is up to Government nor any person either medical or palliative to allow me to pass in an undignified way against my wishes. I have watched family suffer and die unnecessarily and suffer and found it belittling to them so I strongly urge that my wishes be my decision and respected.
Thanks you for taking note of my record.
