Subject: Voluntary Assisted Dying in Queensland

17th June 2021

Dear Sirs,

If you have ever had a family member suffer in agony and wither to a shell of their former wonderful self with a terminal disease, despite the best of so-called "palliative care", as my 48 year-old brother [REDACTED] did, or worse still, take their own life, alone, because of the ensuing sense of despair and hopelessness, as my very talented 84 year-old mother [REDACTED] did, unquestioned support for Voluntary Assisted Dying (legalised euthanasia) in this State and throughout this Country is an absolute no-brainer.

Please pass this Voluntary Assisted Dying legislation, urgently, for the benefit of all Queenslanders who wish to control the end of their own lives and Die With Dignity.

Sincerely,

Malcolm McKellar
