Health Committee,

My wish is to have the VAD Bill as tabled, be accepted into Queensland law. There have been many pro-discussions given which need to be heeded.

Having just gone through the need for palliative care for my husband, I want it known that I fully support the best palliative care practice for all Queenslanders. We received the best palliative care; however, it couldn't help in the end. Thus, the need for VAD.

This legislation, as it is proposed, will serve well those Queenslanders who are suffering and dying, and give them an additional end-of-life choice. I support the proposed bill tabled as is, by Queensland's Premier.

There are many safeguards and strict eligibility criteria which makes me feel very confident in the process.

It obviously been thoroughly thought out and answers all my implementation questions as well as the people and work with, socialise with and those whom I love.

This is important. Very important. We can feel safe with this.

Thank you for your time.

Phyllis Wagner
