Submitter Comments:

"I currently am dealing with Proste Cancer and Bladder Cancer.

I get that we all die sometime, and I genuinely don't fear that.

What I DO fear is the period when one or both of these cancers at the end forces me through a period of intense pain, a terrible quality of life and a massive loss of dignity, all for what? A few extra, horrible months.

I hope never to need to use VAD, and through life style, etc, I'm doing all I can to help myself.

But, just knowing that option is there if things get bad enough will give me huge peace of mind.

Also, I think the planned safeguards, are sensible and well thought out.

Thank you for hearing me.

Sincere regards,
