Submitter Comments:

I support the Voluntary Assisted Dying Bill as I feel very strongly that any human being has a right to choose to end their life with dignity and without suffering if they are terminally ill and have no quality of life.

No one should have to continue their life if they are in extraordinary pain; choose not to have invasive, treatment that may not extend their life or if they are in a position where there is no more treatment available and they are just living on slowly and painfully waiting for their inevitable death. It makes the end of their life horrific and is unbearable for loved ones to watch the suffering. Loved ones grief is extended and their healing can't begin till they can say goodbye...
