Re: Submission to the Health Committee

Dear Health Committee Members,

No to legalized murder!

I work for a large community services based organisation that receives significant amounts of government funding and public funding to improve the quality of people's lives and to prevent suicide. This bill would contradict what the Government and public is spending money to support.

We need to increase the amount of funding for palliative care and also for nursing homes so that our citizens have the will to live and enjoy a live filled with hope, and appreciation of life.

We should not have a law that forces death upon people. This may also be taken advantage of, and have people being killed without their consent.

This law seems like a cop out to free up the welfare and healthcare system from supporting our vulnerable members of society.

I would greatly appreciate your consideration of the above points and advise the government not to proceed with legislating the assisted suicide bill.

Sincerely,
Anna Castrissios
