Submitter Comments:

As an individual i am concerned that religious factions with a backing from international/Domestic respective religious organisation with ties with multi-million dollar entities, will be able to influence the dissensions regarding Voluntary Assisted dying. via inflating the number against Voluntary Assisted dying.

As some whom as studied in the IT sector this this way of community engagement is severely lacking in security

This system is flawed due to the ease of scripting being available there is no check ether the Email accounts are legitimate as well as the votes/Opinions are actually coming from the Queensland population and not international/outer-state.
