Subject: I oppose the "Voluntary Assisted Dying" Bill

Re: I oppose the "Voluntary Assisted Dying" Bill

Dear Health Committee Members,

This bill fails to support the citizens of Queensland opting to remove the problem (the dying person) rather than provide adequate palliative care support. In the last decade I have lived through terminal and lengthy illnesses of both parents. They were treated with dignity and support to the point of death that was peaceful and dignified and a credit to care staff who participated. The family would not have wished it to be different and the idea of assisted suicide is repugnant. Please reject this bill and prefer enhanced palliative care support instead.

Sincerely
Bruce Morgan

Sincerely,
Bruce Morgan
