Subject: VAD bill - It's Time!

Dear MPs,

After all this time, it is long overdue that the VAD bill is passed in Queensland. You have had the benefit of the experience and the examples of the legislation of other states, most recently S.A., after 21 attempts, and notably Victoria. You have had an expert committee and a careful process, and it is time to be progressive and take the step.

I write as the author of 'Euthanasia -

Choice and Death', Edinburgh

University Press, which examined the experiences of the U.S., the U.K., the Netherlands, and Australia. We led the world before being thwarted by federal intervention.

Let Queensland take back the initiative now!

Sincerely,

Dr Gail Tulloch.
