Re: I oppose the "Voluntary Assisted Dying" Bill

Dear Health Committee Members,

Please review the process so that 1. the patient and family members with 2. advice from specialists in palliative care 3. decide the outcome which allows for a rapid natural decline until patient passes. Death is a natural part of our life. Keeping people alive longer than it naturally would without drugs is not a decision for doctors but for the patient and family.

Sincerely,  
Clark Siemsen
