**Subject:** I oppose the "Voluntary Assisted Dying" Bill

Re: I oppose the "Voluntary Assisted Dying" Bill

Dear Health Committee Members,

Dear Committee Members,

As an older Queenslander ( almost 80) and currently undergoing treatment for cancer I am asking that this proposed bill NOT be passed . This assisted suicide bill is an assault on human dignity and the state should not be in the business of assisting its citizens to kill themselves . I understand that the AMA and the Nurses Association are also against this bill as they are sworn to protect human life and here we have a government committee seemingly hellbent on forcing them to be involved in killing the citizens .

In my case I want to know that when my time comes I will be able to appropriate palliative care without the threat of being coerced into committing suicide .

I also wish to add that I am extremely concerned about my 20 year old grandson who is suffering from extreme anxiety and a low opinion of his self worth . Something like this bill will be like a green light to him to committ suicide which would also kill his poor mother (my daughter ) and totally wreck this family. I implore members to vote aganist this bill and I ask that my name not be published for the very reason of keeping my grandson alive,

Yours Sincerely,

[REDACTED]

Sincerely,

[REDACTED]
