Subject: I oppose the "Voluntary Assisted Dying" Bill

Re: I oppose the "Voluntary Assisted Dying" Bill

Dear Health Committee Members,

This proposed bill should be the object of termination itself before it is given life and destroys what is left of the foundations our country and states were built upon and those which help us to enjoy the vanishing freedom and benefits we live with every day. Is the thankyou that our elderly receive for their hard work building and protecting our values and way of life from which we have all benefited from going to be in the form of gratitude and love shown by the highest possible standard of care and commitment in disability, aged and palliative care with no costs spared or will our thankyou be to treat them like sick dogs who aren't worth a visit to the clinic because the pain medication and other fees are too high? and simply dump them under the bus and forget about their human dignity and rights for that matter which many other Australians have enjoyed?

How long are those in government who are pushing this Bill expecting to get away with conning the public that they care about our lives with all the covid agenda and propaganda at the same time as contradictorily killing unborn and born children from failed abortions and now the elderly and mentally and physically sick out of convenience or more likely for profit or a political deal?

It's never too late to show some real guts and true compassion for your neighbour by voting down this bill instead of following the blind out of a senseless fear which makes you vote at any cost to keep your popularity which you will one day have to do without anyway and which when you do finally do without will give back your freedom

Sincerely,
Ivan Basanovic
