Subject: Support for VAD bill

Hello I am most supportive of the passing of the VAD bill which is currently being debated. As a 74 year old man I have watched both my mother and father being kept alive and suffering which in turn has meant terrible suffering for me. I am also aware of my own mortality and need to be able to leave this world at my discretion and timing when that time comes. I do not want to be kept alive when it is time to go. I want to die when I choose.

As such the Qld government must bring the VAD bill into law so that people can make their own mind up with the help of the appropriate medical people and their family support.

sincerely,

Peter Howard AM
