**Subject:** Support for VAD bill

Good morning

I wish to indicate support for this bill. and to make the end of life process more available to people in regional areas, can you please include that doctors be able to communicate electronically with patients on this matter.

Thank you for your humane consideration for this inescapable eventuality - death. Having choice at end of life can make it easier on family members also and a much more comfortable inevitable event.

Best wishes in this important work for all Queenslanders.

Kind regards  
Gretta Evans
