Subject: I support the draft VAD Bill

Dear Health Committee,

I'm writing in support of the draft VAD Bill, as is.

My father went through much unneeded suffering before he died and the draft VAD Bill protocols would have stopped his pain & suffering earlier. We as a family suffered along with him and I hope that once this Bill is passed in its entirety, other families will not have to go through the trauma that we had.

I also believe that doctors must be able to communicate regarding VAD via electronic means with each other and with their patients. This will ensure that Queenslanders in remote communities have access to VAD.

As well as the above, people living in their own home within a retirement village, must be able to access VAD in their own homes.

Please ensure you do the fair, just & right thing by us Queenslanders; pass this draft VAD bill in its entirety. Thank you.

Regards,
Raymond Pentti
