Subject: I oppose the "Voluntary Assisted Dying" Bill

Re: I oppose the "Voluntary Assisted Dying" Bill

Dear Health Committee Members,

I oppose the assisted suicide bill- I am aware of the actual name for the bill. This bill does not address the real issue of personal dignity and right to access appropriate medical aide: including palliative care. Essentially this bill is catering to the vocal group of people who have personal reasons for devaluing human life. Additionally, the bill does not address the psychological impact a terminal health diagnosis has on family and friends and argues that medical access to suicide is a viable and valid treatment option. To introduce a bill like this is morally and ethically abhorrent and should never be considered in a society that has access to good medical care and speaks about the value of human life.

Sincerely,
Stephen Lunn

Sincerely,
stephen Lunn
