**Categories:** Submission

Dear Sir/Madam

I write today to express my complete support for the Voluntary Assisted Dying (VAD) legislation that is currently before your committee.

I wholeheartedly support the legislation in its current form and I see no need for any amendments. I strongly support the right of doctors to discuss VAD with their patients no matter where in this vast state they live and they should be allowed to discuss that via any sort of medium, the more convenient the better.

Finally I strongly believe that people should be able to access VAD no matter where they live but particularly people who own their own homes in retirement villages must be able to access VAD in their own home without any harassment from anyone.

There is no need for me to spell out again the very personal story of mother's passing except to say that watching her in her final days was not at all a pretty picture. That is why I am strong supporter of VAD for Queensland adults because although I am in excellent health now you never really know just what is around the corner.

If you wish to contact me you can do so either by return e-mail, telephone [REDACTED] or by mail at [REDACTED]

Thank you and kind regards

Scott Clark BBUS CPA
