I wish to submit my views on the draft Voluntary Assisted Dying bill ;

I wholeheartedly support it as it is as it's fair to everyone. I believe that the whole of Queensland should have access to it whether they live in Brisbane or anywhere else in our state and I certainly want doctors to have the use of electronic means to have easy access to their colleagues and patients regardless of where they live in our large state.

I also believe Palliative Care should be looked at as complementing VAD. They are both important to patients suffering terminal illnesses or diseases.
