**Comments in relation to:** Other  
**Attachments:** No attachment

**Submitter Comments:**

I believe in this Bill because too many individuals are suffering intolerable and unnecessary pain and/or are in a 'vegetable' state with no recognition of their surroundings or loved ones. Their loved ones also suffer the torment of seeing their relative suffering or non-cognisant. Palliative care can only go so far in alleviating suffering.

Far better for the suffering, or vegetative status to be relieved by a calm and peaceful ending.
