Subject: Fw: Support for V.A.D. legislative social reform

Categories: Submission

With V.A.D. legislated social reform offering the freedom to choose a different painless way of dying as an option for the irreversible ill in order to relieve unrelenting unnecessary suffering and stress in end stage dying then its predictable enough that approximately 80% up-wards of all community surveys indicating support for welcomed change as compared to that of the existing cruel status-quo in Qld.

V.A.D. is about powering people to have the freedom of choice to relieve suffering in end of life decision making which translates into a better quality of life with end stage peace of mind.

With community surveys in our now secular society indicating three out of four Christians in support for legislative change consistent with widespread contemporary global attitudinal change then those in support of the unmerciful status-quo will eventually find themselves on the wrong side of history.

Ron Bennett Senior supporter of V.A.D. Ph - [REDACTED]
