Submitter Comments:

Please do more to control vaping in Queensland. As a mum of two children in high schools, the schools are awash with vaping and teachers seem limited in patrolling what is going on in school grounds and in particular in school toilets. My son avoids the toilets at all costs as he doesn't want to go in while other students are vaping. The easy manor in which children can access vapes (ie via online sales) is ridiculous and then children on-sell these in the school yard. Please provide vape monitoring devices for school bathrooms, stop the import of vapes occurring online, and target/monitor sellers of vapes in shops, service stations etc and ensure they are not selling to minors
