Submitter Comments:

I am surprised to see the government neglecting the fact that many tobacconist are selling smuggled tobacco. This is well known in Toowoomba. They are making thousands in profit without paying taxes. Visit any tobacconist at margaret street and other areas around Toowoomba and you will be surprised from the amount of tobacco available in their stock rooms. The business also offer disposable vapes to teenagers, those disposable vapes are dangerous as the ingredients and amount of nicotine are unknown. Those vapes are wise spread in schools and hear many stories from my children everyday. I am a vaper, it did help me quit smoking for years now. However I have a valid prescription, so I buy the nicotine and the vape juice separately and I mix responsibly as per prescription. I never buy the disposable ones. Please crack down on those tobacconists who sell smuggled cigarettes and disposable vapes. Please note that vape shops sell 0 Nicotine juices that need to be mixed with pure nicotine. And all ingredients and country of origin are clearly listed on all juices.
