Submitter Comments:

Dear, Queensland Parliament. I understand the want for a bill such as this to be passed through Parliament, however it is quite clear that this bill is for monetary gain. This bills also highlights the QLD Parliament ignorance for public safety due to ignoring the most recent and conclusive evidence that Crocodile Culling cause complacency within the community and increases the percentage of attacks on humans. This statement refers to the recent study conducted by CDU researchers - The influence of crocodile density on the prevalence of human attacks Baker, Cameron J.; Campbell, Mariana A.; Udyawer, Vinay; Kopf, R. Keller; Campbell, Hamish A. If the government is prioritising monetary gain over the safety of the general public but stating that it will protect the community, that is failure of the Australian way of life and utterly disgraceful. I am sure that the government would not try and pass a bill without doing their diligence by doing their research. As a member of the general public and an experienced problem crocodile re-locator under the NT gov. I hope that this bill does not pass as it would have a higher risk of potential attacks on humans. Thank you for your time and I am sure the Government will prioritise human safety over monetary gain. Kind regards. Nic Pond.
