I ask you to reconsider this bill. You need to use your common sence, educate the public, put signs up, accidents happen mostly because people behave recklessly.

We need to respect these animals that were here well before us. Culling is wrong. Farming is wrong. Yes crocodiles are wired to protect their space. This is why you don't see crocodiles roaming down our streets in the city. They don't live where we do. We go into their environment "to fish or swim!" It is selfish and lacking basic common sence on our part as humans.

Leave them alone. Stop coming from a place of fear. It is disgusting. You should know better, and when you do, change happens for the good of ALL. not just you.

Have an inventive day,
