

Inquiry - Improving Queensland's Container Refund Scheme

Submission No: 21

Submitter Comments:

I regularly pick up rubbish in my neighbourhood. I have seen a large reduction in the number of drink containers being discarded. However, I also believe that 10 cents is not enough to incentivise some people to recycle and such a low refund value allows large corporations to watch this cost be inflated away. The amount of the refund should be increased in line with any increase in retail price.
