

Waste Reduction and Recycling (Strengthening the Container Refund Scheme) Amendment Bill 2026

Submission No: 002

Submission By: Darcy Ringland

Publication: Making the submission and your name public

Dear sir / madam (committee members)

My submission is very simple - the payment of refunds should not only go up but be legislated for increases every 3 or 5 years and automated legislatively.

Why should i support the exchange program - when i get 30% or more from the local metal recycler?

as we know where the money goes.

I also ask that the exchange program be legislated to help community non profit organizations and a minimum % there of. As we need to put things back into our community.

Thank you

Darcy Ringland
