TO WHOM IT MAY CONCERN

Please consider this submission into the "Fly in, fly out and other long distance commuting work practices in regional Queensland" inquiry.

Health issues such as obesity and food poisoning from unhealthy camp food. Depression from being forced to live away from family and friends. Loneliness causing married men & woman to have affairs. Sexual exploitation to get secure job positions over more qualified locals.

Its destroying small towns, causing major safety hazards on site with unskilled, fatigued workers putting lives at risk. Major cause of family disharmony, depression, anxiety & marital breakdowns.

Stop condoning this destructive practice, STOP FIFO all together.. Stop discriminating against local workers and give families the right to choose to move and live in the towns closest to the work sites. Employ qualified locals first and NO unqualified FIFO workers.

Regards

Kevin Blyton
