TO WHOM IT MAY CONCERN

Please consider this submission into the "Fly in, fly out and other long distance commuting work practices in regional Queensland" inquiry.

I commuted for the first 3 years of my mining career before the strain on myself and my family became to much and we moved to emerald

High level of stress and fatigue for both worker and family's , fatigue in any industry is deadly

There is only one solution live local employ local this not only limits fatigue but builds a stronger community and workforce

Regards

Shane Cook
