

## TO WHOM IT MAY CONCERN

Please consider this submission into the "Fly in, fly out and other long distance commuting work practices in regional Queensland" inquiry.

I travel 500km to work, driving my own vehicle. I usually share the drive with others that are on my crew at work. Do my tour and head straight off back to townsville.

Concerns are the company completely wipes their hands of me once I finish work. Rural roads are littered with dangers. No phone service for a 300km stretch.

I never wish to live in moranbah. I am applauded by the company for this stance. But I believe the company should supply travel for myself

Regards
